

WHO IS THIS COURSE FOR

Aimed at educators at all stages seeking to integrate AI tools into their teaching practice safely, ethically, and pedagogically

"AI is not here to replace teachers, but to empower educators to shape wiser, more creative futures"

Focused on 6 key areas of IA
for educators

AI Foundations & Tools

Multimodal AI Creation

Generative Text & Prompts

AI Agents & Automations

Ethics & Cybersecurity

Applied AI Project

Participants work in small teams to prototype AI solutions for authentic classroom challenges, guided by expert facilitation and culminating in an applied final project

METHODOLOGICAL APPROACH

Project-Based Peer Learning

ACADEMIC PROGRAMME - 6 WORKSHOPS

30 hours

AI Foundations & Tools

- 1 Explore generative AI models, chat ecosystems, data security best practices, and educational tools

Text Models & Prompting

- 2 Compare LLMs (ChatGPT, Gemini, Claude) and master multi-tiered prompt engineering techniques

Ethical AI & Integrity

- 3 Analyze hallucinations, bias, deepfakes, academic integrity, and source-grounded research in NotebookLM

Creative Multimedia AI

- 4 Create teaching materials using text, image, audio, video, diagrams, and co-design workflows.

Agents & Automated Workflows

- 5 Configure educational AI agents, set ethical boundaries, and design automated workflow routines

Applied AI Implementation

- 6 Develop, present, and evaluate a center-tailored AI project with continuous peer feedback
